cometchat

**Installing Jamroom as CometChat Module ( Jamroom 5+ )**

For Manual Installation please follow the steps:

1. Unzip the downloaded package. You should see two folders modules.

2. Upload the entire 'ccCometChat' folder from 'modules' folder to your Jamroom 'modules' directory. For example, if your site URL is http://www.yoursite.com/jamroom, it should be placed at http://www.yoursite.com/jamroom/modules/ccCometChat.

3. Please CHMOD the following files and folders to 777:
/cometchat
/cometchat/config.php
/cometchat/cache/
/cometchat/modules/
/cometchat/plugins/
/cometchat/temp/
/cometchat/lang/
/cometchat/themes/
/cometchat/plugins/handwrite/uploads/
/cometchat/plugins/filetransfer/uploads/

4. Login to your Jamroom admin panel.
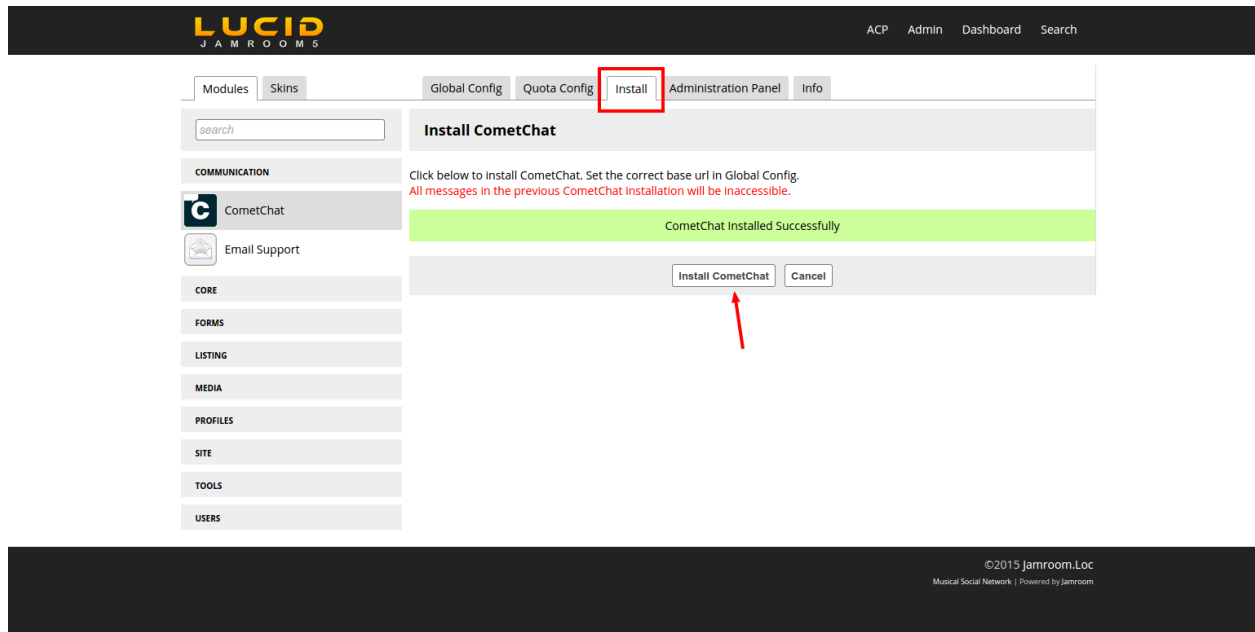

- Goto ACP > System Tools

5. Click on communication tab in the side panel. Now CometChat icon should be visible.

6. Open this tab and enable the module.

7. Go to the Install Tab and click install CometChat.

 You should get the 'CometChat Installed Successfully' message.

8. Enjoy CometChating!

9. To allow CometChat for specific quotas (user groups) go to Quota Config tab.
   Here select the quota for which you wish to enable/disable CometChat.
